

Certified in Risk and Information Systems Control (CRISC)

Course Duration: 4 Days + 1 Day Exam Preparation

Course Overview

The CRISC course is an intensive, four-day review program to prepare individuals who are planning to sit for the Certified in Risk and Information System Controls™ (CRISC) exam. The course focuses on the key points covered in the CRISC Review Manual 6th Edition and includes class lectures, group discussions, exam practice and answer debriefs. The course is intended for individuals with familiarity with and experience in IT and enterprise risk management.

Target Audience

This course is intended for:

- IT and Business Professionals
 - Risk and Compliance
 - Business Analysts
 - Project Managers
-

Prerequisites

There are no prerequisite requirements for taking the CRISC course or the CRISC exam; however, in-order-to apply for the CRISC certification, the candidate must meet the following requirements as determined by ISACA:

- Three (3) years of work experience managing IT risk by designing and implementing IS controls, including experience across at least two (2) CRISC domains, of which one must be in Domain 1 or 2, is required for certification
 - There are no substitutions or experience waivers
-

Course Objectives

On completion of this program, participants will be able to:

- Identify risks
- Assess current and potential risks
- Respond and Mitigate risks
- Ensure risk and control monitoring as well as risk reporting
- An understanding of the format and structure of the CRISC certification exam
- A knowledge of the various topics and technical areas covered by the exam
- Practice with specific strategies, tips and techniques for taking and passing the exam
